Summary

Myself Danish Mehraj pursuing Mater of Computer Applications. I am a tech savvy who likes to contribute the world in terms of technology. App developers have genius and deep logical minds, so I develop apps for Windows, android and other platforms. Apart from this, I like to listen to music. I have also many interests like dancing, singing, speaking on-to-many, online gaming and remote sensing games like playing games on Xbox 360 with Kinect. Moreover I want to develop 3D interactive games so that kids enjoy well. Most interesting thing, I want to create a female digital personal assistant for myself as in Iron-Man there is a J.A.R.V.I.S, which will assist me in my every activity accordingly by giving real life voice commands. When my digital personal assistant will be ready I would love to name her 'Intefem'. Please little bit more...I will need to try to think of positive things about people instead of thinking negative. Maybe thinking about their background or their life situation, and realize how good my own situation is. I have to also realize that these people a part of God's family. God created them because he wanted to. I have no right to judge others as I will be judged someday by a Higher Power. So, I know I won't be perfect, but from now on I would really like to try to be nicer to people both in my words and my thoughts. All of these people who I do not know personally have wonderful and beautiful things to say to me, based on things that I have said and published in my hubs. This is what has made me decide to become a better person.

Experience

Junior Assistant   May 2017 - Present
Ministry of Finance

I work as Junior Assistant in Accounts and Treasuries Department(Ministrty of Finance).
Currently I am posted in Additional Treasury, Tankipora Srinagar, holding National Pension System (NPS) table.

Microsoft Student Partner   May 2013 - Present
Microsoft

The 'ideal candidate' would be a passionate and enthusiast individual who wants to learn about new tools and technologies. You would need to have a whole range of skills including excellent time management, organization and communication skills to ensure that you could host successful campus events. An MSP should be comfortable and confident presenting in front of large audiences of both students and faculty members. General marketing skills come in very handy in order to allow you to articulate your ideas effectively when presenting. MSPs are social, friendly and approachable individuals who like to meet new people. You will require the ability work as a team as well as use your own initiative. In summary, MSPs are innovative and creative students who are extremely passionate about technology and who like to help others.
Campus Evalgelism
Mar 1, 2013 to present
I am carrying out sessions on Microsoft Technologies like Windows 8, Windows Phone 8, Windows Azure etc.
Windows Phone Application Development
Jan 1, 2013 to present
In short Windows Phone 8 is the latest mobile OS developed by Microsoft. It offers a new user interface called Metro.

The Windows Phone Application Platform provides two frameworks for developing applications:
The Silverlight framework for event-driven, XAML-based application development. I.e. you use Silverlight for building applications that you can submit to the marketplace.
The XNA Framework for loop-based games. I.e. you use XNA to develop games that you can submit to the marketplace.
Windows Application Development

Jan 1, 2013 to present
A Windows Application is a windowing application built with the Microsoft Foundation Classes (MFC)
WIMP (windows, icon, menu, pointer) GUI
Event-driven, Multi-processing
OOP, Client-Server, Component-based, Distributed Computing etc. are now supported, but not initially in MS
Windows
